INDUSTRIAL ACCIDENTS AND WORKERS COMPENSATION STATISTICS: PRELIMINARY STATEMENT, 1969-70

This publication contains preliminary statistics of industrial accidents reported to the Victorian Government Statist during 1969-70 under the provisions of the Workers Compensation Regulations. For comparative purposes statistics for 1965-66 to 1968-69 are also included.

The collection is restricted to fatal cases and to those where the worker was incapacitated for work for a period of one week or more. Reports included relate to workers compensation claims finalised during 1969-70, and to claims reported as unclosed after a period of three years. Thus the cases to which the statistics relate did not necessarily occur in 1969-70.

The effect of the provisions of the Workers Compensation Act should be noted:

- (a) In accordance with the provisions of the Amendment Act 1965, the definition of "worker" excludes any person employed whose remuneration exceeds \$6,000 per annum. However, some employers do insure against liability for employees whose income exceeds the amount specified in the Act.
- (b) Commonwealth employees and self-employed persons are excluded from the provisions of the Act.

Industrial Accident. For the purpose of this collection, the following definition has been applied: "An Industrial Accident is a compensated work injury causing death, permanent disability, or absence of the injured person from work for one week or more, excluding journey cases, cases occurring during a recess period, and all disease cases except where the disease is considered to be precipitated or aggravated by an accidental event".

Information has been included concerning accidents occurring on journeys to and from employment or during a recess period, disease cases, and workers compensation business transacted.

For further definitions see the more detailed annual bulletin to be released at a later date.
